

Week of AI

Running from July 15-19, the Week of AI consists of 15 different virtual workshops that are packed with must-know information for 2024-25. Covering practically every major issue facing schools today, the Week of AI allows district-level leaders, instructional technologists, department heads, or star teachers to explore further within their areas of interest and responsibility.

Pop in for one, or stay for the whole week!

Pricing: \$29/course or all 15 sessions for \$229/attendee

Introduction to AI (July 15)

AI 101 (8:00am-10:00am PST | 11:00am-1:00pm EST)

Dive into the basics of Artificial Intelligence with AI 101, a comprehensive introduction for K-12 educators. Explore AI's potential to transform teaching & learning, understanding its core concepts & terminology. Perfect for beginners, this workshop will equip you with foundational AI knowledge to integrate into your classroom.

The Legal Ramifications of AI (10:30am-12:30pm PST | 1:30pm-3:30pm EST)

Explore the critical legal aspects of implementing AI in education. Understand privacy, ethics, and policy considerations to navigate AI's legal landscape confidently. Essential for educators, this workshop prepares you to address legal challenges and protect student data in your AI initiatives.

Building Your AI Plan for 2024-25 (1:00pm-3:00pm PST | 4:00pm-6:00pm EST)

Strategize your school's AI journey with a clear, actionable plan for the 2024-25 academic year. Learn to set goals, allocate resources, and measure success in integrating AI technologies. Tailored for educational leaders, this workshop is your roadmap to a transformative AI-powered teaching and learning environment.

AI in the Content Areas (July 16)

Improving Math Instruction with AI (8:00am-10:00am PST | 11:00am-1:00pm EST)

Transform math education with AI-driven tools and methodologies. Discover how AI can personalize learning, enhance problem-solving skills, and engage students in math instruction. Ideal for math educators, this workshop will provide strategies to integrate AI seamlessly into your curriculum.

How AI Can Help Improve Student Literacy (10:30am-12:30pm PST | 1:30pm-3:30pm EST)

Elevate literacy instruction with AI's adaptive learning technologies. Learn to leverage AI tools that support reading and writing skills, catering to individual student needs. This workshop offers literacy educators innovative approaches to enhance engagement and achievement in reading and writing.

Elementary Learners and AI (1:00pm-3:00pm PST | 4:00pm-6:00pm EST)

Introduce AI to young learners with age-appropriate tools and concepts. Discover how to spark curiosity and creativity in elementary students using AI. This workshop provides educators with resources and ideas to integrate AI into the early learning environment, fostering a foundation for future learning.

High-Impact Instructional Shifts (July 17)

Individualizing Instruction With AI (8:00am-10:00am PST | 11:00am-1:00pm EST)

Harness AI to create personalized learning experiences for every student. Learn to use AI tools that adapt to individual learning styles, needs, and paces. This workshop is designed for educators seeking to enhance differentiation and student engagement through technology.

AI and the Science of Learning (10:30am-12:30pm PST | 1:30pm-3:30pm EST)

Bridge AI technology with cognitive science to revolutionize how students learn. Explore AI applications that align with how the brain processes information, enhancing memory and understanding. Ideal for educators interested in the nexus of technology and pedagogy, this workshop illuminates AI's role in effective learning

Better Instructional Supports With AI (1:00pm-3:00pm PST | 4:00pm-6:00pm EST)

Leverage AI to strengthen instructional support and educator capacity. Discover AI tools that assist in lesson planning, assessment, and classroom management, freeing up time for direct student interaction. This workshop is perfect for educators looking to enhance their teaching practices with AI.

AI for Climate & Culture (July 18)

Nurturing Student and Staff Wellbeing With AI (8:00am-10:00am PST | 11:00am-1:00pm EST)

Promote a healthy school climate with AI-driven wellbeing initiatives. Learn to utilize AI tools for mental health support, stress reduction, and positive school culture. This workshop is essential for educators committed to fostering an environment where students and staff thrive.

Marketing Your School or District With AI (10:30am-12:30pm PST | 1:30pm-3:30pm EST)

Elevate your school's profile with AI-powered marketing strategies. Learn to harness data analytics and automated tools to enhance communication, engagement, and reputation. This workshop is designed for educators and administrators aiming to showcase their school's achievements and initiatives.

Using AI to Drive Community Engagement (1:00pm-3:00pm PST | 4:00pm-6:00pm EST)

Strengthen community ties with AI's data-driven insights. Explore how AI can enhance communication, collaboration, and engagement with parents, local businesses, and stakeholders. This workshop offers strategies for using AI to build a supportive and engaged school community.

AI for Classified & Support Staff (July 19)

AI for Classified and Support Staff (8:00am-10:00am PST | 11:00am-1:00pm EST)

Empower your school's support staff with AI tools to streamline operations and enhance efficiency. From administrative tasks to student services, learn how AI can automate routine tasks and support staff roles. This workshop is tailored for classified and support staff looking to integrate AI into their daily work.

AI for HR (10:30am-12:30pm PST | 1:30pm-3:30pm EST)

Revolutionize your HR department with AI's automation and analytics. Learn to optimize hiring, onboarding, and employee management with AI-driven processes. This workshop is designed for HR professionals in education, providing strategies to enhance efficiency and decision-making.

AI for Business Services (1:00pm-3:00pm PST | 4:00pm-6:00pm EST)

Transform your school's business services with AI-driven efficiencies. From budgeting to procurement, explore how AI can optimize operations, reduce costs, and improve service delivery. Ideal for administrators and business managers, this workshop showcases AI's potential to streamline school operations.
